

## **Antonio Valenti**

Dr Antonio Valenti graduated in Political Science at the University of Naples. He got his PhD (International School on Human capital formation and labour relations) at University of Bergamo. He is currently researcher at the Department of Occupational and Environmental Medicine, Epidemiology and Hygiene of INAIL (Italian Workers' Compensation Authority) and Principal Investigator of WHO Collaborating Centre (WHO/CC) for occupational health and safety.

He is full member of the Advisory Committee for Safety and Health at Work (ACSH) of the European Commission and full member of the Management Board of the European Agency for Safety and Health at Work (EU-OSHA) as Government representative.

Co-author of INAIL Methodology for the assessment and management of work-related stress (WRS) risk dealing, in particular, with the WRS regulatory framework at national and European level.

His research activity is focused on new and emerging risks due to the changing world of work and analysis of research OSH priorities and policies (e.g. new technologies, aging workforce, migrant workers, etc.). He was involved in different research programs in order to allow a continuous and mutual transferability of results through a process discussion and sharing of research results with other agencies, international and national institutions engaged in similar activities.

He has large experience in networking and social interaction with different stakeholders (Research community, Social Partners, Decision Makers) both at national and international level on the basis of different experience in different national and international projects.
