

Bruna Maria RONDINONE, MS, MPhil

Bruna Maria Rondinone graduated in Statistical and Economic Sciences at the University of Bari (Italy) in 2001. She got her postgraduate specialization degree (MPhil) in Health Statistics at University of Rome "Sapienza" discussing the thesis titled "The use of Disability Adjusted Life Years (DALY) and the quantification of burden of stroke: a systematic review" in 2009.

Starting from 2002, she is researcher at Department of Occupational and Environmental Medicine, Epidemiology, and Hygiene in the Laboratory of Psychosocial risks and protection of vulnerable workers of INAIL (Italian Workers' Compensation Authority), formerly ISPESL (Italian National Institute for Occupational Safety and Health).

She is member of the systematic reviewers' group of WHO Guidelines on protecting workers from potential risks of manufactured nanomaterials and WHO/ILO Joint Estimates to estimate the burden of disease of some pathologies.

Her main research interests are focused on identification of research priorities at national and international level, occupational carcinogenesis, work-related stress, nanotechnologies, burden of disease, occupational epidemiology, data analysis, systematic reviews, and meta-analysis. She has a long experience in designing and administering surveys through online platforms.

Co-author of more than 100 national and international scientific publications/abstracts in the field of occupational safety and health. Excellent skills in the use of statistical packages.
